Quality Policy

West Inspection AS focus shall be continual improvement of our Total Quality Management System in accordance with ISO 9001:2015.

West Inspection AS aims to give quality support to the offshore market and shall continuously strive to satisfy our customers demand and to improve our support in line with rules and regulation, given by the flag state and/or class society. This is achieved by inserting the necessary resources, involvement and development of internal resources, as well as tight communication with our customers and other external resources.

A systematic process-based approach for registration, monitoring, reviewing and auditing key performance indicators in our Total Management System, is the core of our business as we continuously seek to maintain and develop our operational practices in line with ruling guidelines and regulations.

Responsibility for maintaining the Total Quality Management System is put on every manager within his/her respective division.
